IronCAD Integrates Directly To Sketchfab

Share And Display IronCAD 3D Content Online

IronCAD announces a direct integration allowing upload to Sketchfab, a website used to display and share 3D content online. IronCAD users can share their models on Sketchfab for embedding on any web page or sharing on platforms like Tumblr, WordPress, Behance, Facebook, Kickstarter, LinkedIn, deviantART, etc...

IronCAD allows for free unlimited upload to Sketchfab, which means that designers can have an unlimited number of models available online. Because Sketchfab offers a universal 3D viewer, anyone can display IronCAD models out of the box in most browsers and smartphones.

By offering a direct link from within IronCAD, customers can now effortlessly share their models on social media, blogs, forums, or any website. Furthermore, the IronCAD community can find and download thousands of 3D models for printing, videogame production, and more.
