Datakit expands its bundle of plug-ins for ThinkDesign

Datakit now offers two new import plug-ins for ThinkDesign. They enable ThinkDesign users to import files in JT (.jt) and Rhino (.3dm) formats in ThinkDesign very easily.

These imports have been added to the ThinkDesign import bundle without changing its price. This package of 12 import plugins remains at the price of 3000€!

All new purchasers of an import bundle for Think Design, as well as users who already have this bundle with an up to date maintenance can therefore take advantage of these new import formats right now!
